Essex County Council's Response to Net Zero: Making Essex Carbon Neutral

1. Introduction

Net Zero: Making Essex Carbon Neutral, sets out recommendations to 2050 and recognises that Essex County Council (ECC) cannot tackle this challenge alone. This document therefore outlines the immediate actions ECC is taking directly and in concert with partners to drive effective progress against the Essex Climate Action Commission's (ECAC) recommendations.

The ECC responses follow the structure of the Commission report under the key themes of land use and green infrastructure, energy, built environment, transport, waste, and community engagement. Please note that all funding commitments outlined below will be for the next 4 years to 2025/26 (unless stated otherwise).

2. Commitments

Essex County Council has adopted a new organisational strategy Everybody's Essex (ref: FP/172/10/21). This sets out four key strategic objectives for ECC as set out in the table below:

KEY for Cor	ntributions to Str	ategic Com	mitments				
Strong Inclusive & Sustainable ECONOMY		High Quality ENVIRONMENT		HEALTH, wellbeing & Independence for All Ages		A Great PLACE for Children & Families to Grow	
3/2	Good Jobs		Net Zero	8	Levelling Up Health		Education Outcomes
	Levelling Up the economy	*	Transport & Built Environment	14	Healthy Lifestyles	iM i	Levelling Up Outcomes for Families
~	Infrastructure	23	Minimise waste	††	Promoting Independence		Family Resilience & Stability
2	Future Growth & Investment		Levelling Up the Environment	*	Place based Working		Safety
11/2	Green Growth		Green Community	•	Carers	***	Outcomes for Vulnerable Children

One of the four strategic objectives is a core commitment to a High Quality Environment. This includes commitments to deliver on net zero targets; to deliver a step change in sustainable travel and support net zero and climate resilient housing developments; to reduce waste and deliver a more circular economy; to help our communities be more resilient against flooding; heat stress and water shortages; and

to work with communities and businesses providing advice and support to enable them take action to reduce green house gas emissions and build their own climate resilience. The commitment to a strong, inclusive and sustainable economy includes a commitment to green growth in Essex.

ECC is therefore committed to ambitious climate action and is embedding this across every aspect of Council service delivery. We also recognise that delivery of climate action also meets other ECC strategic objectives and this is set out below.

3. Cross Cutting Projects Within ECC

Essex County Council is leading a number of cross-cutting projects within the Council itself which are contributing to tackling climate change. ECC recognises that action on one theme can benefit another, and this has a cumulative positive impact:

3.1. Ways of working

The Ways of Working (WoW) Programme is to explore a future way of working at Essex County Council. It will have an impact on goals to meet climate change targets, reducing the energy we use and the waste we create.

ECC colleagues are working in different ways now to meet the needs of different people in Essex.

We know that a 'one size fits all' model will not work for our organisation, due to our range of different services with different needs. We also know that we will not return to using our workspaces as we did previously. We're focusing on:

- updating our workspaces and making them more comfortable to work in
- reducing how much energy we use and waste
- how we use technology, and making sure it works properly
- developing new hybrid workstyles that will work for every job role
- keeping the health, safety, and wellbeing of our people a priority
- supporting managers as they adopt hybrid working for themselves and within their teams

The ways of working programme is being undertaken in parallel with a property review and the final outcomes will frame future work in line with policy to make ECC estate net zero by 2030.

3.2. The Essex Pension Fund

Essex Pension Fund administered by Essex County Council recognises both their responsibility to be a trusted investor and the range of potential long-term risks associated with climate change that the Fund, as a long-term investor, faces. The Investment Steering Committee has appointed specialist external managers to a range of investment mandates. The financial impact of issues, including climate change, forms one part of the process that determines the investments made on the Fund's behalf. From this a full stakeholder consultation commenced summer 2020,

with the outcome of this being the formulation of a new Responsible Investment (RI) Policy based on a set of RI Investment Beliefs which includes climate change and forms part of the Fund's Investment Strategy Statement.

3.3. ECC Investments

Climate change will likely affect long-term investment returns. Temperature increases and measures taken to limit global heating will translate into lower returns on some assets. Climate change leads to conditions where economies are less productive and productivity growth is a key driver of economic growth. It is therefore important to mitigate these impacts where reasonable and practical to do so.

3.4. ECC Procurement

ECC outsources the majority of its services and as such has a significant spend with third party organisations. ECC introduced consideration of climate impacts as part of its social value procurement strategy launched in July 2021. The procurement team are reviewing policies and practices to build on this foundation and establish the most effective way of ensuring that climate considerations are taken into account in this third party spend. The whole procurement lifecycle will be considered, from contract specification, requirements at tender stage and performance monitoring. We will engage with existing and prospective suppliers throughout the review to better understand how we can work collectively to tackle climate challenges.

4. Land Use & Green Infrastructure

Net Zero: Making Essex Carbon Neutral made a number of recommendations on land use and green infrastructure, including 50 per cent of farmland in Essex to adopt sustainable land stewardship practices by 2030; 75 per cent by 2040 and 100 per cent by 2050, and coastal flood resilience schemes in critical areas to be implemented by 2023.

Essex County Council has made one of its 20 strategic objectives, "Levelling up Environment", which states "we will help all our communities to enjoy a high quality environment by making them more resilient against flooding, heat stress and water shortages, by enhancing our county's green infrastructure and by reducing air pollution." This is a very good reflection of the Land Use & Green Infrastructure work going forward and acts as a vision for the Climate Adaptation and Mitigation teams.

The basis for our work in Land use & Green Infrastructure is the 2020 Green Infrastructure Strategy which has provided an Action Plan which forms the platform of our Green Infrastructure work. This includes establishing a pan-Essex Local Nature Partnership, developing a Green Essex Fund, researching the very real potential investments of Biodiversity Net Gain metrics, Carbon credits, CSR payments and water company investments and delivering the Essex Forestry Initiative, which exceeded its targets in Year 1 (20-21).

The following table sets out the projects ECC are already committed to, the financial spend and how these align with ECC's strategic aims and how they meet the ECAC

recommendations. A number of these demonstrate that ECC is already going beyond these requests.

The following table sets out the projects ECC are already committed to, the financial spend and how these align with ECC's strategic aims and how they meet the ECAC recommendations. A number of these demonstrate that ECC is already going beyond these requests.

Initiative	Description	Financial commitment	Align ECC Strategic aims
Flood Resilience - Capital Flood Programme	The floods capital programme is aimed at reducing surface water flood risk to the communities of Essex. The current programme has been highlighted as a priority up to 2024/25. The projects delivered through the capital programme will not only reduce surface water flood risk, but they will incorporate Natural Flood Management and Green Infrastructure measures that will provide environmental benefits such as habitat creation, carbon reduction/sequestration and health & wellbeing.	Capital 50% ECC funded, £6.57m. 50% Env Agency Grant, £1.97m 2021/22	
Flood Resilience — Community Climate Resilience Plans	Local Councils and the public more informed on steps they can take to address the climate emergency – whether adaptation or resilience. E.g. more informed about their flood risk and other climate change impacts in line with ECAC findings. Implementing proportionate local plans for mitigation and adaptation measures. Linking up with existing community groups and supporting the Essex Climate Action Commission changemakers programme.	£60,700 Revenue, Service Improvement Reserve	
Essex Forest Initiative	In October 2019, we committed to plant 375,000 trees over the next five years. The primary reason is to lock up carbon, offsetting the carbon produced which is contributing to ongoing climate change. The trees will be planted across Essex, including on our own and other council's land and land from partners in voluntary sectors. The first year's planting target was 25,000 trees. We went beyond this and actually planted 38,615. This Initiative is supported by a Forestry Officer funded by the ECAC until April 2023. ECC works in partnership with other authorities and charities across Essex. Essex County Council was successful in securing a £300,000 grant from the Forestry Commission. The Local Authority Treescape Fund is designed to support tree planting outside of woodlands. As such, work has been undertaken with borough and district partners (Colchester, Harlow and Epping Forest) and ECC has one site of its own (Cressing Temple Barns) to deliver the planting and maintenance of 5,595 trees (some whips and some standard sized street trees).	Revenue New Investment £220,000 2022/23-2025/26. £300,000 grant from Forestry Commission	

Building with Nature	to write a set of Green Infrastructure Standards, which can be used to assess local planning policy and new	£680,000 drawdown from Climate Change Reserve 2021/22 to 2022/23 Sustainable land use.		2000		
Green Streets	Essex Highways are the custodians of the public realm and there are multiple benefits to green initiatives, principal amongst these are flood reductions and urban heat stress reduction. To reduce the uncertainty about annual income we propose a Green Infrastructure Maintenance Reserve based on 35,000 trees at £55 per tree.	£1.925m 2022/23-2025/26.	Page	** 41		
Local Nature Partnership	We have been working closely with the Essex Wildlife Trust (EWT) the Royal Society For the protection of Birds (RSPB) and Natural England to set up a Local Nature Partnership. The LNP will pull together over 80 diverse groups and organisations to co-ordinate a countywide approach to levelling up the environment and identifying options to make the most efficient use of resources. We hope that the first meeting will take place in November 2021. The organisations listed above are also undertaking a mapping exercise to identify suitable Nature Recovery Networks that we expect will form part of an Essex-wide Nature Recovery Strategy.	Revenue New Investment £267,000 2022/23-2024/25.	*	*	á ÍÍ	
Strategy (Statutory)	The Environment Bill is introducing a statutory requirement for a Local Nature Recovery Strategy (LNRS). While the Environment Bill will require LAs to develop an NRS, the responsibility for delivery will be held across multiple partners. ECC are also seeking to have a partnership approach to adapting Essex to a Net Zero environment. We will set up a Local Nature Partnership (LNP). ECC are funding a new Green Infrastructure Delivery officer post until April 2023 and a LNRS and LNP officer for 2 years from January 2022.	Linked to Local Nature Partnership	****	*	ά Ů Ŷ>	
Strategy		· ·		***		

5. Energy

The Commission has recommended that 'Essex produces enough renewable energy within the county to meet its own needs by 2040', with the Commission seeing a critical role in this for large scale solar production but 'on available land without unduly compromising agricultural land'; that there should be a network of community energy neighbourhoods across every district; solar panels to be installed on every roof—and all fuel poor homes should be retrofitted.

ECC is committed to playing its part, sourcing its own electricity from renewable sources; supporting establishment of new community energy groups; helping 670 residents source solar panels and battery storage through a bulk scheme Solar Together; and supporting roll out of Government fuel poor grants, seeing 82 homes upgraded in the last year and supporting uptake of future grant funds totalling £5.2m (plus £17.2m and £2.58m pending successful bids to Sustainable Warmth Competition and Social Housing Decarbonisation Fund)

Initiative	Description	Financial commitment	Align E	CC Strategic aims
	Using our purchasing power as an electricity customer to encourage investment in additional renewable energy generation such as solar farms or onshore wind and enable ECC to source green renewable energy to power its offices and street lighting. This will give ECC some protection against energy price volatility and the potential to make long-term cost savings on our electricity bill.	£337,000 Revenue.		
renewable energy on the public estate	Action plan to develop opportunities across ECC's public estate to generate renewable energy including rooftop solar on our buildings ERO and 14 schools, solar canopies and ground mounted systems across the rest of our estate. Builds upon £140k EU funded scheme EMPOWER that delivered solar on Danbury Country Park, Danbury Primary and St John's Primary schools delivered in 2020/21	Property Decarbonisation	←	****
sex a centre for innova- tion in re- newable en- ergy – Local area energy decarbonisa- tion	South East New Energy, a grant funded programme to tackle the barriers to local areas rapidly decarbonising their communities, buildings, and lives. The project will deliver pathfinder projects on affordable net zero housing and retrofit in domestic housing through communal solar and storage and develop proposals for community ownership of large scale solar. It will identify and address barriers to delivering and financing projects at scale. ECC is working in partnership with Kent County Council.	SE New Energy Grant: £6.4m shared across Essex and Kent.		*
policy	Action plans and planning policy guidance to support the development of renewable energy generation in the county including but not limited to solar farms, onshore wind, bioenergy, and hydrogen production.			*

Solar Together	Solar Together is a unique group-buying scheme for solar photovoltaic (PV) panels and battery storage. This scheme will make solar PV and batteries more accessible and more affordable for a great number of people. This is open for residents and SMEs. Solar Together delivered solar panels on 305 households: a £1.3M investment saving 7,150 tonnes of carbon over the lifetime of the installations. Residents saved an average of 20% on market rates.	Management of the scheme by ECC resource.		
Essex Energy Switch	The Essex Energy Switch is a county wide collective energy switching campaign designed to help Essex residents reduce their gas and electricity bills. We support residents to switch supplier through a collective energy switching campaign each year. 61,000 households have switched since 2014, saving more than £3.9M; on average £230 per household. 2020/21 Campaign – 2,323 switched their energy tariffs; an average of £161 per household; 1,989 tonnes of CO2 saved per year, 100% renewable electricity tariffs	Management of the campaign by ECC resource.	***************************************	

6. Built Environment

Net Zero: making Essex Carbon Neutral recommendations focus on ensuring new development is fit for the future with recommendations for new schools to be net zero by 2022; new homes and commercial buildings to be net zero by 2025 and all to be carbon positive by 2030. Developments also need to support active travel and deliver climate resilience with sustainable drainage as standard.

The second challenge is to recognise that whilst we need to look forward, we also need to recognise that over 80% of the built environment of Essex in 2040 already exists now, hence retrofit is a significant area of work.

The Commission recommends all schools have smart meters by 2021, and half should be retrofitted to net zero by 2025 anchor institutions, including ECC should be net zero by 2030 and 100% by 2030. Also, by 2030, all anchor institutions- the large public sector organisations across Essex – should ensure their estates are net zero; all fuel poor homes should be retrofitted and supplied with affordable energy and two thirds of all homes retrofitted to net zero. All retrofitting should include water as well as energy efficiency measures and a stronger policy on sustainable drainage should be supported.

Action is also being taken to train the trainers, and support the frontline town planners, building inspectors and elected members. Our research undertaken in 2020 revealed a huge appetite and demand for an ongoing programme of training, and access to best practice guidance as well as have technical specialists/expertise to support the District Councils in the formulation of planning policies, the evaluation of technical evidence submitted, in order to push forward the new standards needed

within the Local Planning Authorities Planning to deliver Net Zero new developments by the 2025 recommended target date.

As part of its estate management strategy, ECC undertakes an annual maintenance programme covering all its built estate and the maintained school's estate. A significant element of this work includes roof, window, and heating system replacements and ECC are working to deliver low or zero carbon alternatives and upgrades when delivering these projects.

Progress is being made to upgrade existing schools and the ECC estate through the utilisation of grant funding to deliver Solar PV, LED lighting and Air Source Heat Pump projects.

Like many other authorities' ECC is currently reviewing its estate portfolio and working to develop an updated Estate Strategy in line with new Ways of Working. The running costs and carbon footprint of existing assets are a key consideration in establishing the future portfolio and ensuring that ECC can achieve its climate change targets. With a rationalised estate and a clear strategy in place, the authority will be better able to target carbon reduction investment on property that is to be retained long term and roll out more retrofit projects.

	pumps, as well as considering how we can best ensure biodiversity is unaffected, or even improved on schemes. Residential units at the next two schemes to be brought forward, Purford Green and Shenfield Library, are designed to achieve an EPC 'A' rating and a carbon neutral pilot scheme is also currently being identified. It is expected that the Future Home Standard will launch in 2025 and under this standard CO2 emissions will be at least 75% lower than homes built today and Essex Housing will continue to seek to exceed these standards wherever it can viably do so. Essex Housing are bringing forward a pilot Net Zero – For Construction materials and in operation – development which will also give full consideration to climate resilience			
New Schools Net Zero	of net-zero carbon school expansions, the first of which was handed over for school us su	nked to schools tro fit to net zero, pport provided by CC resource.		
Anchor Institution commitments	ECC has a policy to transform its own estate to zero by 2030. ECC will continue to work with canchor intuitions who are also taking action on their estates. 	 Provide quality sustainable modes of transport which maximise modal shift to ensure 50% of trips use sustainable modes. Deliver a long-term stewardship model that supports the quality of place created and is capable of sustaining this long term. 				
Prepare a Developers Climate Change Charter	(EPOA) to produce a pan-Essex Charter which sets out what the construction and development industry will commit to move towards carbon zero development in Essex. ECC are providing a system leadership role to help make this work happen.	The investment is ECC officer time and resource.			
	The aim is to have all major developers that operate in Essex to sign-up to the Climate Change Charter.				
Training for members and officers	Training to provide an overview of Climate Change and Planning related matters to Essex Planners and Members across the county. Additional training in the delivery of BREEAM Assessments. This work has been commissioned and will commence in November and funded from the first CMA drawdown.			*	
Climate Action Planning Team to Build Back Better and help deliver on Net Zero new build	Planning Team (CAPT) of specialists/experts within Planning to advise and support district	Revenue New Investment £699,000 2022/23- 2025/26.	**************************************	₽	
	This new investment will provide ECC capacity and specialist knowledge to work with District, Borough & City Councils and ECC as a developer focusing on planning, housing, and estate managers to provide good design and appropriate challenge and support so that new build and development proposals positively contribute to meeting our climate change targets.				

7. Transport

We will deliver a step change in sustainable travel across the county, by growing passenger transport and active travel and will ensure we support the move towards net zero. All our work is delivered in partnership, either with districts, central

government or suppliers and is aligned with the transport priorities within Everybody's Essex.

Our approach is "Avoid – Shift – Improve', avoiding unnecessary motor vehicle trips; encourage residents to shift to other more sustainable modes such as walking, cycling and public transport; and improving the sustainability of those journeys which are essential such as improving bus provision and developing a strategy for electric charge points.

ECC has made great progress on delivering against our recommendations, most obviously through the development of 5 active travel schemes totalling ~£8M. The schemes will reallocate road space to make it easier to walk and cycle and have been designed in partnership with our districts. They will be delivered in Summer 2022.

We have also taken two proposals for famous congestion hotspot the Army & Navy junction out to public consultation. Rather than simply build another road junction for cars, we have focused on developing a solution for people, following best practice guidance for walking and cycling routes. This is being developed in conjunction with local MPs, Parish and City Council, the DfT, Essex Highways, Jacobs and Highways England.

We have introduced electric scooter trials, in partnership with a private operator, in 6 locations delivering near 500,000 trips, actively delivering modal shift from car and onto net zero alternatives.

We have launched Essex Pedal Power, in conjunction with Sport England, Tendring District Council, The Active Wellbeing Society, SELEP and Active Essex, - a community-based bike project giving 1,300 residents in Jaywick Sands and Clacton a new bike free of charge. The new inclusive programme aims to make cycling accessible for everyone providing access to employment, training and educational opportunities or key local services. We hope to roll this scheme out to other districts next year.

We have launched our Safer Greener Healthier and Stop Swap Go behaviour change campaigns, communicating our sustainable transport ambitions with residents.

Going forward, our priorities will be to develop Local Cycling and Walking Infrastructure plans for our districts, developing a long-term framework which will guide future investment in walking and cycling infrastructure.

We will be developing our Alternative Fuels strategy, rolling out electric charge points and electrifying the ECC car fleet.

We will also be developing our Bus Services Improvement Plan to rebuild the Essex bus network, reverse the long term decline in passengers, delivering modal shift from car and improving public health.

Initiative	Description	Financial commitment	Align ECC Strategic aims
		£4.75m ECC capital funding for cycle infrastructure	

	coherent network across the county, increase walking through the development of walkable neighbourhoods and encourage active travel in young people through the creation of school streets. During Covid we introduced semi-permanent segregated cycle paths and we recently completed public consultations on five active travel schemes, worth £8M. These schemes will reallocate road space to provide more space for people walking and cycling, provide public realm improvements, and implement 10 school streets. The schemes will be implemented in Colchester, Chelmsford, Braintree, Brentwood and	Capital Grant £50,000 received 2020/21 Revenue Grant received £919,000 2020/21			
	In addition ECC Is directly investing £x to develop new cycle paths across the county. We launched our first Walking Strategy in September 2021.				
Cycle Assets Renewal	The purpose of this programme is to ensure that existing cycle infrastructure is brought up to standard and is safe and fit for purpose and is therefore attractive to users. Capital investment for asset renewal of cycleways across the County – business case submitted to Capital Challenge on 20th Sept	Capital Priorities Recommended £3.0m 2022/23-2025/26.	***************************************	Ā	
	significant energy saving, and therefore carbon reduction. One year into the programme	Capital (Phase 2, 3, 4) Programme: £26.87m 2021/22-2024/25. ECC Funding: 100%			

Warm Tarmac pilot	Essex Highways is trialling warm tarmac, which is hoped will become the standard material for inlay surfacing. This form of asphalt is better for the environment because it uses less energy when it is being mixed and laid. This one simple switch is expected to significantly reduce carbon emissions and work is underway to quantify this saving.	Within existing Capital Programme.		S		
Bus Back Better	Essex County Council will shortly (by the end of October) publish its Bus Service Improvement Plan. This will set out how buses can help deliver Safer, Greener, Healthier travel in Essex. The plan sets out specific measures where Essex County Council (ECC) will work with the bus industry and other partners to deliver safer, greener, and healthier travel by: Rebuilding the Essex bus network to recover from the impact of the COVID-19 pandemic Developing an attractive, sustainable, and af-fordable bus network, offering an alternative to car use. Reversing the long-term decline in passenger numbers, in absolute terms and as a modal share of all journeys. Improving public health and addressing climate change by reducing pollutants such as particulate matter, nitrogen oxides (NOx), ozone (O3), sulphur dioxide (SO2) and carbon dioxide (CO2) emissions, produced by cars in Essex. Switching your journey from car to bus, if it's not possible to walk or cycle, is a key way to reduce carbon emissions and help mitigate climate change. It is also an in-vestment in your local community, economy and environment	Capital Priorities Recommended £500,000 2022/23. Revenue New Investment £884,000 2022/23- 2025/26. Revenue Grant £443,000 2021/22.				
Behaviour Change	New investment in the mobilisation of a wider behaviour change programme beyond current activity to help drive the Safer, Healthier, Greener ambition. Funds will be spent on behaviour change expertise to develop the evidence base and a campaign manager to work alongside them and the rest of PPH to ensure that everything we're delivering – be it potholes or cycle ways – are making Essex Safer, Greener & Healthier.	Revenue New Investment £450,000 2022/23.		***************************************	*	
Transport & Parking Planning Policy	To provide ECC capacity to update Transport and Highways policies in line with emerging priorities from DfT, the new transport hierarchy and Climate Commission recommendations. This will take the form of multiple one-off projects.	Revenue New Investment £675,000 2022/23.	♣	* *	*	

Electric Vehicle Charging Network	plan for Essex. This is funded by the Climate Commission and will include electrifying the ECC fleet (below), developing a model for countywide charge point roll out and exploring alternative fuel for freight. The strategy will focus initially on on-street residential charge points, for those 40% of households who do not have access to offstreet parking.	£200,000 Capital 2021/22.	**		
	Our objective is to ensure that for any trip which must be by road, is done so as sustainably as possible.				
ECC Electric Fleet Pilot	We have conducted a Fleet Electrification Review to consider the path forward for ensuring vehicles used in delivering our services are all hybrid or electric and have committed to introducing EV into our own car lease fleet this year.	Drawdown from Climate Change Reserve £200,000 Capital 2021/22.		S	

8. Waste

In 'Our Plan for Essex' we have committed to *Minimise Waste* and reduce its environmental impacts, by supporting residents and businesses to reduce waste and increase recycling, and by working towards a more circular economy where we better protect our natural resources.

We have already committed to zero waste to landfill by 2030, through the delivery of waste reduction, enhanced recycling and sustainable disposal. We are relaunching our Recycling Centres by bringing this service in-house and focussing it on meeting local need and providing enhanced opportunities to reuse and recycle. Whilst our engagement with residents and partners thorough 'Love Essex' and the 'Blueprint for a Circular Economy' project is ensuring we are all better equipped to reduce waste and its environmental impacts.

Our focus on the future through the development of a new Joint Municipal Waste Management Strategy for Essex with our partners has begun. This will develop over the coming year and will provide the required framework for a generational shift in how we view and manage waste and the polices and approaches needed to deliver our ambition. This strategy will have tackling climate change at its core to ensure waste system design, procurement and operational approaches actively contribute to net zero targets.

9. Community Engagement

9.1. Finance

Total financial commitments by way of Revenue New Investment for Engagement and Communications £1.57m to 2025/26. Spend will be incurred on charges for staff communication, social media and delivery and support roles. This amount also includes charges for marketing, ECAC event, website development, training and research costs.

9.2. Summary of Activity

ECC has developed a detailed communications strategy, taking a three-pronged approach to communications activity:

- Formal communications
- Stakeholder engagement
- Community engagement

We will communicate to traditional audiences (such as general public, media outlets) via regular channels (such as e-newsletters and media releases). This will primarily be one-way communication, pushing key messages out en-masse and be less labour intensive.

A media release will be issued after each Commission meeting detailing what has been discussed or agreed. The chair and other commissioners will be offered for interview. For any interviews secured, an interview briefing will be developed for the interviewee.

Also, under this prong, more formal social media activity will be undertaken via newly established ECAC accounts on Facebook, Twitter and Instagram which point traffic to and complement the Essex is Green work.

Key characteristics

- Develops overarching comms strategy and plan
- Develops and delivers key messages via 'traditional' channels
- Generally one-way broadcast of key messages with the exception of social media activity
- Commission's identity, design, employee comms and content support from central comms team
- Measures and evaluates comms activity

ECC has committed to working across the county to hit its net zero targets, by ensuring that the Council significantly reduces its carbon footprint whilst also supporting an acceleration in the progress towards sustainable housing and energy, and active and alternative forms of travel. It has committed to engaging with communities and businesses, providing advice and support to enable and empower local action.

The Commission recommended that we invest in research to identify Essex audience groups and develop more targeted communications. Extensive research to underpin future communications was undertaken in the first half of 2021 looking into the attitudes of Essex residents and their willingness to undertake action on climate change. This research has been shared across District, Borough and City Councils across Essex. Alongside this, there was a public consultation on many of the Commission's key recommendations, the results of which were published as the community engagement annexe to the Commission's report, Net Zero – Making Essex Carbon Neutral.

The Commission recommended that an online resource be developed to enable individuals to take action on climate change and a website has been developed for this purpose: essexclimate.org.uk This acts as a growing resource for the community in Essex to understand how they can take action on climate.

ECC is working with the Essex Association of Local Councils, offering a series of climate-related webinars is helping to address the recommendation that local authorities should align on messaging around climate. The Net Zero Innovation Network has already been established, as recommended by the Commission to bring together businesses and anchor institutions to develop innovative climate solutions within the county.

ECC has started to develop climate action packs for specific groups such as residents, schools and businesses, to give practical advice on how each of us can play our part in tackling climate change. In September 2021 we also began rolling out a series of webinars to support town and parish councils in tackling climate change at a local level. By supporting others in taking action, we can make even faster progress towards our climate goals.

ECC continues to support the Essex is Green social media channels which are a collaboration between ECC, the Commission and local social media admins to enable more Essex residents to understand the work we are already doing to tackle climate change and learn how they too can become more involved in our journey to net zero.

Finally, just last month, ECC was proud to become official partners in Ashden's Let's Go Zero campaign to encourage schools across the county to become carbon zero by 2030.

These are some of the areas of communication (section 9.3) and community (section 9.4) we are already prioritising as we continue to consider the Commission's other recommendations relating to community engagement.

9.3. Communication and Education

Initiative	Description	Align ECC Strategic aims
Advice Packs	We are producing advice packs aiming at different audiences explaining to them the impact climate change is having, what they can do about it and how to get involved. Initially we are producing packs for residents, schools and businesses.	YYYY
Low Carbon Bus Event	Wednesday 1 September saw the COP26 Carbon Battle Bus arrive in Essex, as it made its way across the country in the build-up to the 2021 United Nations Climate Change Conference, taking place in Glasgow in November.	
	The bus stopped off at the GRIDSERVE Electric Forecourt in Braintree where an event was held by the Essex Climate Action Commission. The event showcased some of the action that is being	

	taken both around the county and locally in Braintree in the fight		
	against climate change.		
	The event featured talks from Toddington Harper, Chief Executive		
	at GRIDSERVE, alongside representatives from Essex County		
	Council, Braintree District Council, Brentwood Borough Council and		
	the Net Zero Innovation Network (NZIN).		
	Following the completion of the event Cllr Kevin Bentley and Cllr		
	Graham Butland, leaders of Essex County Council and Braintree		
	District Council respectively, planted a tree on the GRIDSERVE		
	site to symbolise the commitment to climate action around the		
	county.		
	A full recording of the event can be found on the Essex Climate		
	Action Commission's YouTube channel.		
	A further event at Gridserve took place on Oct 29 which brought		
	together local government and business leaders from across the East of England.		
	Last of England.		
Carbon App	Essex Climate Action Commission is currently about to start the pro-	S	
	curement process for a carbon counting app which tracks an individ-		
	ual's carbon footprint, suggests ways to reduce their carbon footprint		
	and rewards actions by awarding carbon credits they take to mitigate the footprint.		
	the rootprint.		
	Retailers, hospitality and other relevant businesses in Essex would be		
	encouraged to sign up to accept the carbon credits and provide an en-		
	vironmentally friendly reward. An ECC reward could be a free water		
	butt or composting bin for example. A retailer could give a reusable cof-		
	fee or water cup etc.		
	Versions of the app would also be available to schools and businesses.		
	versions of the app would also be available to sollools and businesses.		
	The Commission aims to find a pre-existing app that we could white la-		
	bel.		
	NA/Inv		
	Why We need to become a net zero county by 2050. Individual residents		
	have a large role to play in helping us achieve that. The app would be a		
	way to engage residents, schools and businesses and get data on who		
	is doing what and measure the level of success.		
	• Impact		
	The app will engage and inform residents about small changes they		
	can make to their daily life to offset their carbon footprint. It would reduce the county's carbon footprint		
	It would reduce the county's carbon lootprint It would give residents a way to engage and participate in climate		
	It would encourage behaviour change		
	It would reward positive behaviour		
	change action It would encourage behaviour change		

Carbon Literacy Programme	Essex County Council is currently procuring training for members and officers to increase their knowledge of climate change, how it impacts Essex and what they can do to tackle it. It is imperative that key members and officers fully understand climate change and the need for the county to become net zero by 2050.		Ť	
	Key members and officers also need to understand how the county can reduce carbon emissions to become net zero by 2050			
	The Department for Business, Energy and Industrial Strategy (BEIS) has funded the Carbon Literacy Project to provide a series of open-source materials, the first of which was an all-employee pro- gramme which has been designed and published. There are a number of different courses which have been developed or are in development: Generic Staff Course Leadership and Management Course Elected Members Course			
	Parish and Town Councils Course – Coming Soon Community Leaders Course – Coming Soon Pension Fund Trustees and Managers Course – Coming Soon			
School Sustaina- bility Kit	200 kits will be developed for young people age 5-11 along with 50 school kits, working with young co-chairs of the commission to help author and promote a sustainability kit for schools and young people. Schools would compete to win one of the sustainability kits.	\$	Ť	n
	Kits will be comprised of:			
	 Wildflower seeds to plant Composting tips Activity handbook with quizzes, i-spy style games Plastic free stickers 20 things I can do to save the planet poster 	11 11	Ĩ	
	 The aim is to ensure: 50 Essex schools supported to teach young people about sustainability and climate change 200 young people engaged in learning about climate change Carbon reduction through activities young people engage in Inspiring the next generation and harness young people's interest in climate change. Educating of young people about climate change A reduction in the county's carbon footprint 			
TryLife Project	ECC has commissioned TryLife to produce an interactive app aimed at young people. The app has been coproduced with young people in schools and will teach them about the causes, impacts and effects of climate change locally and globally, as well as teaching them about advancements in policy and technology in this area. The aim is to empower young people to make choices that have a positive impact in terms of climate change.	#11	ř	n n
Warm Homes Essex Website Promotion	We will continue to work alongside the Citizens Advice Service to promote "Warm Homes Essex". This initiative sees a team of specialist energy advisers operating across the county who work with clients identified as being in "fuel poverty" and help them to improve their financial and physical circumstances. Work to revamp the website has been undertaken and the website will be relaunched later this year.	¥11¥1	1	đ i

ECAC Website	Maintaining the Administration and Support of the ECAC website and Officer Time		

9.4. Empowering our Communities

Initiative	Description	Align ECC Strategic aims
& Essex	Essex Is Green social media channels actively engage and inspire thousands of residents online to get involved and tackle climate change reaching over 10million newsfeeds since we launched last July and over 8000 followers since September 2021. Changemakers group was opened where over 100 Essex admins or local community group leaders could meet to work and learn together to achieve their shared goals of fighting climate change and improving the environment.	
Resident Research Work	Annual research to benchmark residents' attitudes to climate change and measure positive progress and attitudinal change among Essex residents	S YYYY
	The new £500k Climate Action Challenge Fund for local community groups and schools, gives an opportunity for up to £20,000 of funding to deliver activities that respond to key climate challenges in Essex. Funding is available until March 2023 https://www.essex.gov.uk/leisure-culture-lo-cal-heritage/culture-and-communities	TITT
EALC webinars	ECC is hosting a series of webinars for EALC members across the various themes of the Commission's work to help encourage and support action at parish and town council level. The series of workshops began in September 2021 and will be rolled out bi-monthly between now and July 2022	YYYY

10. Supporting Our Businesses

Essex County Council has made a strategic commitment in its organisation strategy (*Everyone's Essex*), to ensure that it delivers a Strong, Inclusive & Stable Economy, as well as a High Quality Environment. The strategy encompasses 20 commitments, including Good Jobs, Net Zero and Green Growth. Fostering, developing and sustaining green growth in the county is central to our strategy for regional economic growth.

Essex County Council is clear in its ambition to "develop Essex as a centre for innovation, supporting new technologies and business models to enable our economy to transition to net zero and secure green jobs for the future by ensuring we have the right local skills and drawing in investment opportunities"

This is supported by the work of the newly-established Net Zero Innovation Network, a group 30-plus businesses, academic institutions and public sector working collaboratively to develop a pipeline of delivery around the themes emerging from the Essex Climate Action Commission. Together the pipeline will ensure joined up working and help to secure funding opportunity to deliver transformational green projects.

Essex County Council is looking to support the growth of businesses within Essex enabling a thriving economy in the medium and long term. This means not only supporting green businesses but encouraging all business to be green. There are particular opportunities which will secure investment from Government and the private sector but only if we can produce the evidence and analysis to support the business cases/test cases needed. ECC will also need to lead the market showing the opportunity to business, via leveraging its purchasing power, and that of fellow anchor institutions to facilitate Green Business Growth within Essex.

Initiative	Description	Financial commitment	Align ECC	Strategic	aims	
Net Zero Innovation Network (NZIN)	NZIN will bring together individuals from a wide range of education and business sectors across Essex. The aim is to support partnerships and drive innovation, helping Essex achieve its target of being a net zero carbon emissions county by 2050. The Network develop and deliver new projects which will be defined and owned by Network members. There is a particular focus on themes emerging from the Essex Climate Action Commission including: transport, energy, waste, the built environment, and land use and green infrastructure	Revenue New Investment £1.95m 2022/23-2025/26.	*		***	
Green Growth	Essex County Council is looking to support the growth of businesses within Essex enabling a thriving economy in the medium and long term. This means not only supporting green businesses but encouraging all business to be green. There are particular opportunities which will secure investment from Government and the private sector but only if we can produce the evidence and analysis to support the business cases/test cases needed. ECC will also need to lead the market showing the opportunity to business, via leveraging its purchasing power, and that of fellow anchor institutions to facilitate Green

11. Evaluation and Monitoring

We are already committed to produce annual reports to track:

- Essex County Council's greenhouse gas emissions and climate resilience measures.
- Greenhouse gas emissions and climate reliance measures across Essex.

Aligning with the organisational strategy Everyone's Essex there will be a suite of KPI's supporting the high quality Environment strategic aim reporting on a quarterly basis.

We are in process in developing a waste strategy and reviewing service design and the lifecycle of waste.

We recognise we are just at the start of this process and are working towards developing an evaluation framework for individual climate action projects/ programmes. The objectives of this evaluation are to understand how these climate actions contribute towards achieving the Net Zero target.

12. Summary Finance Schedule

Below is a financial summary schedule combining all service areas taken from the Capital MTRS, Capital recommended priorities, External funding and new Revenue investments from the Climate Change reserve, Service Improvement reserve and Transformation reserve.

Capital amounts are based on the percentage allocation funded by ECC and are as at MTRS P5 Position with Climate selected as the primary outcome. Capital recommended priority items are not currently part of the capital programme and subject to review and approval.

Staff costs associated for teams working on Climate change activity is in addition to the costs below and amount to £1.96M per annum for c39 FTE.

Total external funding and financial commitment of £200.3m including external grant funding (subject to offer) and staff costs to 2025/26. This includes the request for additional revenue investment of £10.3m and Capital investment of £6.5m to 2025/26.
