

The TE2100 Plan 10-Year Review Consultation

The consultation is live on citizen space 26/09 – 20/11

Takes account of the discussions at workshops and remote engagement on draft outcomes

Is for:

- Public
- Partners & organisations

Outcomes - FCRM

- Intervention deadlines:
 - Upstream raising 2065 → 2050
 - Downstream raising remaining at 2040 but enabling local evidence to confirm Policy Unit level requirements
- Highlighting the importance of the system-wide approach (fixed/active assets, major barriers and how the interventions of the Plan are linked)
- Better managing tidal, fluvial and surface water risk with partners – integrating plans & strategies
- Resilience – how can we collaborate with partners and communities to improve it?

Place making & sustainability

- Climate resilient growth
- Delivering multiple benefits and the riverside strategy approach – key role for tidal councils in achieving these outcomes
- Carbon and nature emergencies
- Achieving a Circular economy approach

Policy Unit specific outcomes

More bespoke outcomes tailored to geography and challenges, aiming to create a framework of adaptability for local operations to work within:

- Defence raising (inner and outer estuary)
- Resilience in Policy 3 areas – forming a plan to adapt and implement measures
- West London fluvial flood risk & reduced reliance on the Thames Barrier
- Tying into local growth opportunities (Essex)
- Securing land for potential new barrier locations

What local issues & challenges would you like to see included?

Structure of the updated Plan

- We want to make sure that the updated TE2100 Plan includes the most relevant information for everyone who uses it and is easy to access/understand.
- New structure is driven by benefits and how we can improve monitoring of progress
- Consultation questions about
 - content and structure
 - Features such as videos, slide packs, interactive maps

Timeline
