Table 7. Summary of evidence on vaccine effectiveness against different outcomes for the Delta variant

Outcome	Vaccine effectiveness*			All
	Pfizer-BioNTech Cominarty	AstraZeneca Vaxzevria	Moderna Spikevax	
Infection	75 to 85%	60 to 70%		60 to 85%
Symptomatic disease	80 to 90%	65 to 75%	90 to 99%	65 to 99%
Hospitalisation	95 to 99%	90 to 99%	95 to 99%	90 to 99%
Mortality	90 to 99%	90 to 95%		90 to 95%

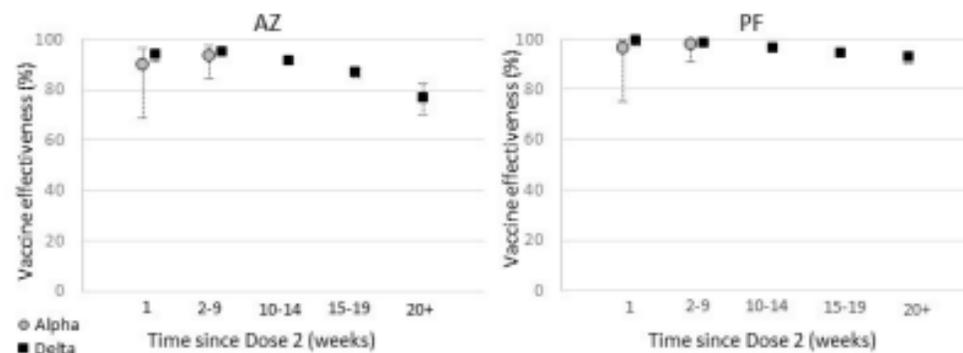

*Estimates of initial vaccine effectiveness in the general population after a 2-dose course. This typically applies for at least the first 3-4 months after vaccination. For some outcomes there may be waning of effectiveness beyond this point.

Figure 1. Vaccine effectiveness against Delta symptomatic disease, hospitalisation and death among individuals aged 16+ with two doses of Vaxzevria (AZ), Comirnaty (PF) or Spikevax (MD) in England and 95% confidence intervals.

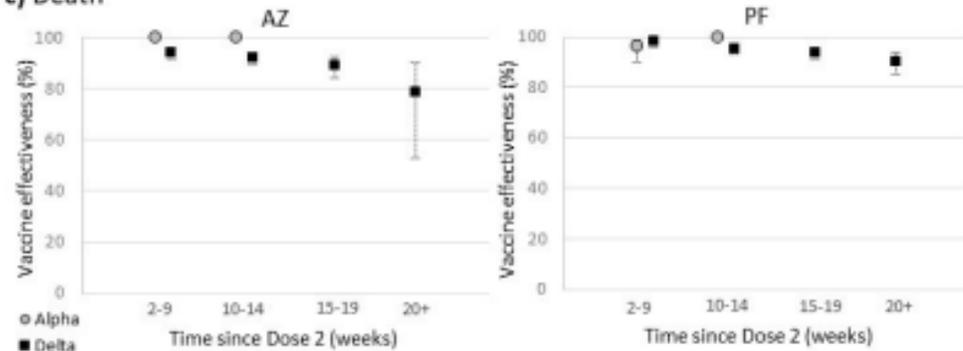

a) Symptomatic disease

b) Hospitalisation

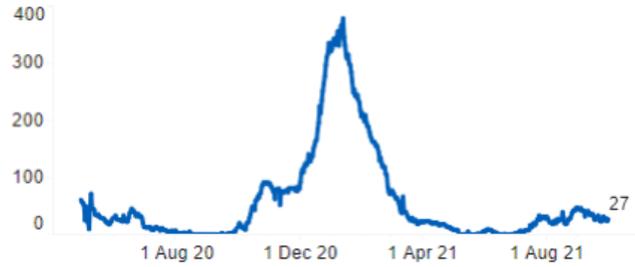

c) Death

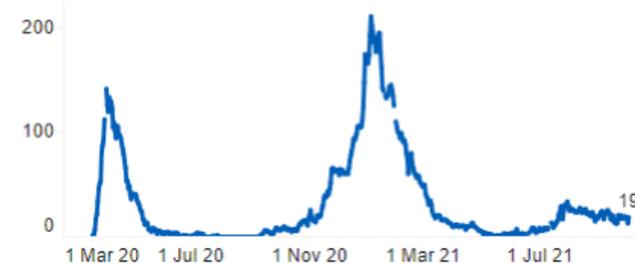

Basildon (27 - 7 ITU)

Number of confirmed COVID-19 patients occupying beds as of 8am

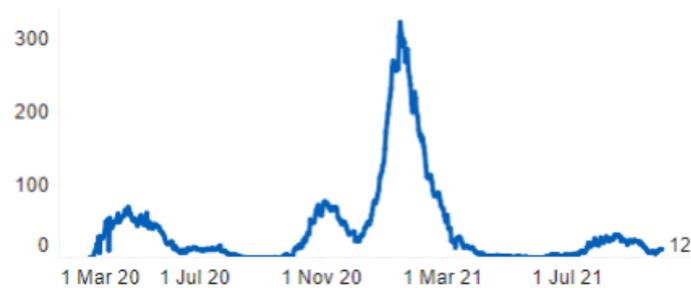

PAH (19 - 5 ITU)

Number of confirmed COVID-19 patients occupying beds as of 8am

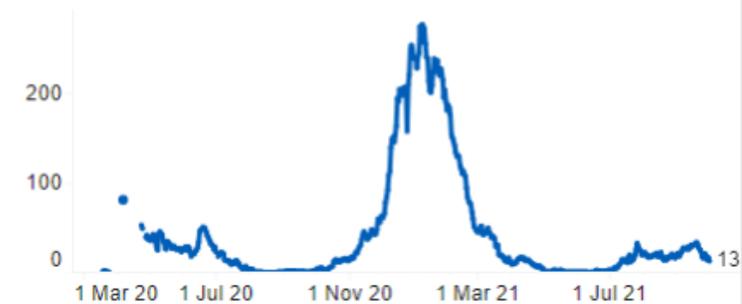

Colchester (12 - 2 ITU)

Number of confirmed COVID-19 patients occupying beds as of 8am

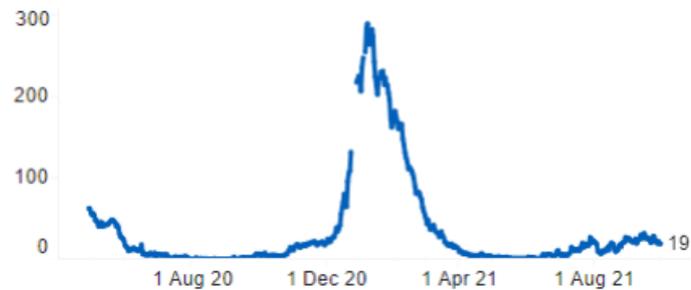

Southend (13 - 13 ITU*)

Number of confirmed COVID-19 patients occupying beds as of 8am

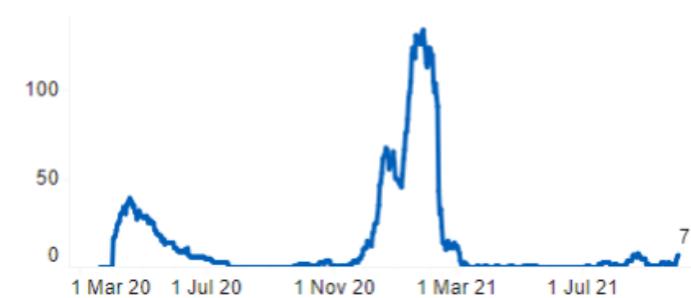

Mid Essex (19 - 2 ITU)

Number of confirmed COVID-19 patients occupying beds as of 8am

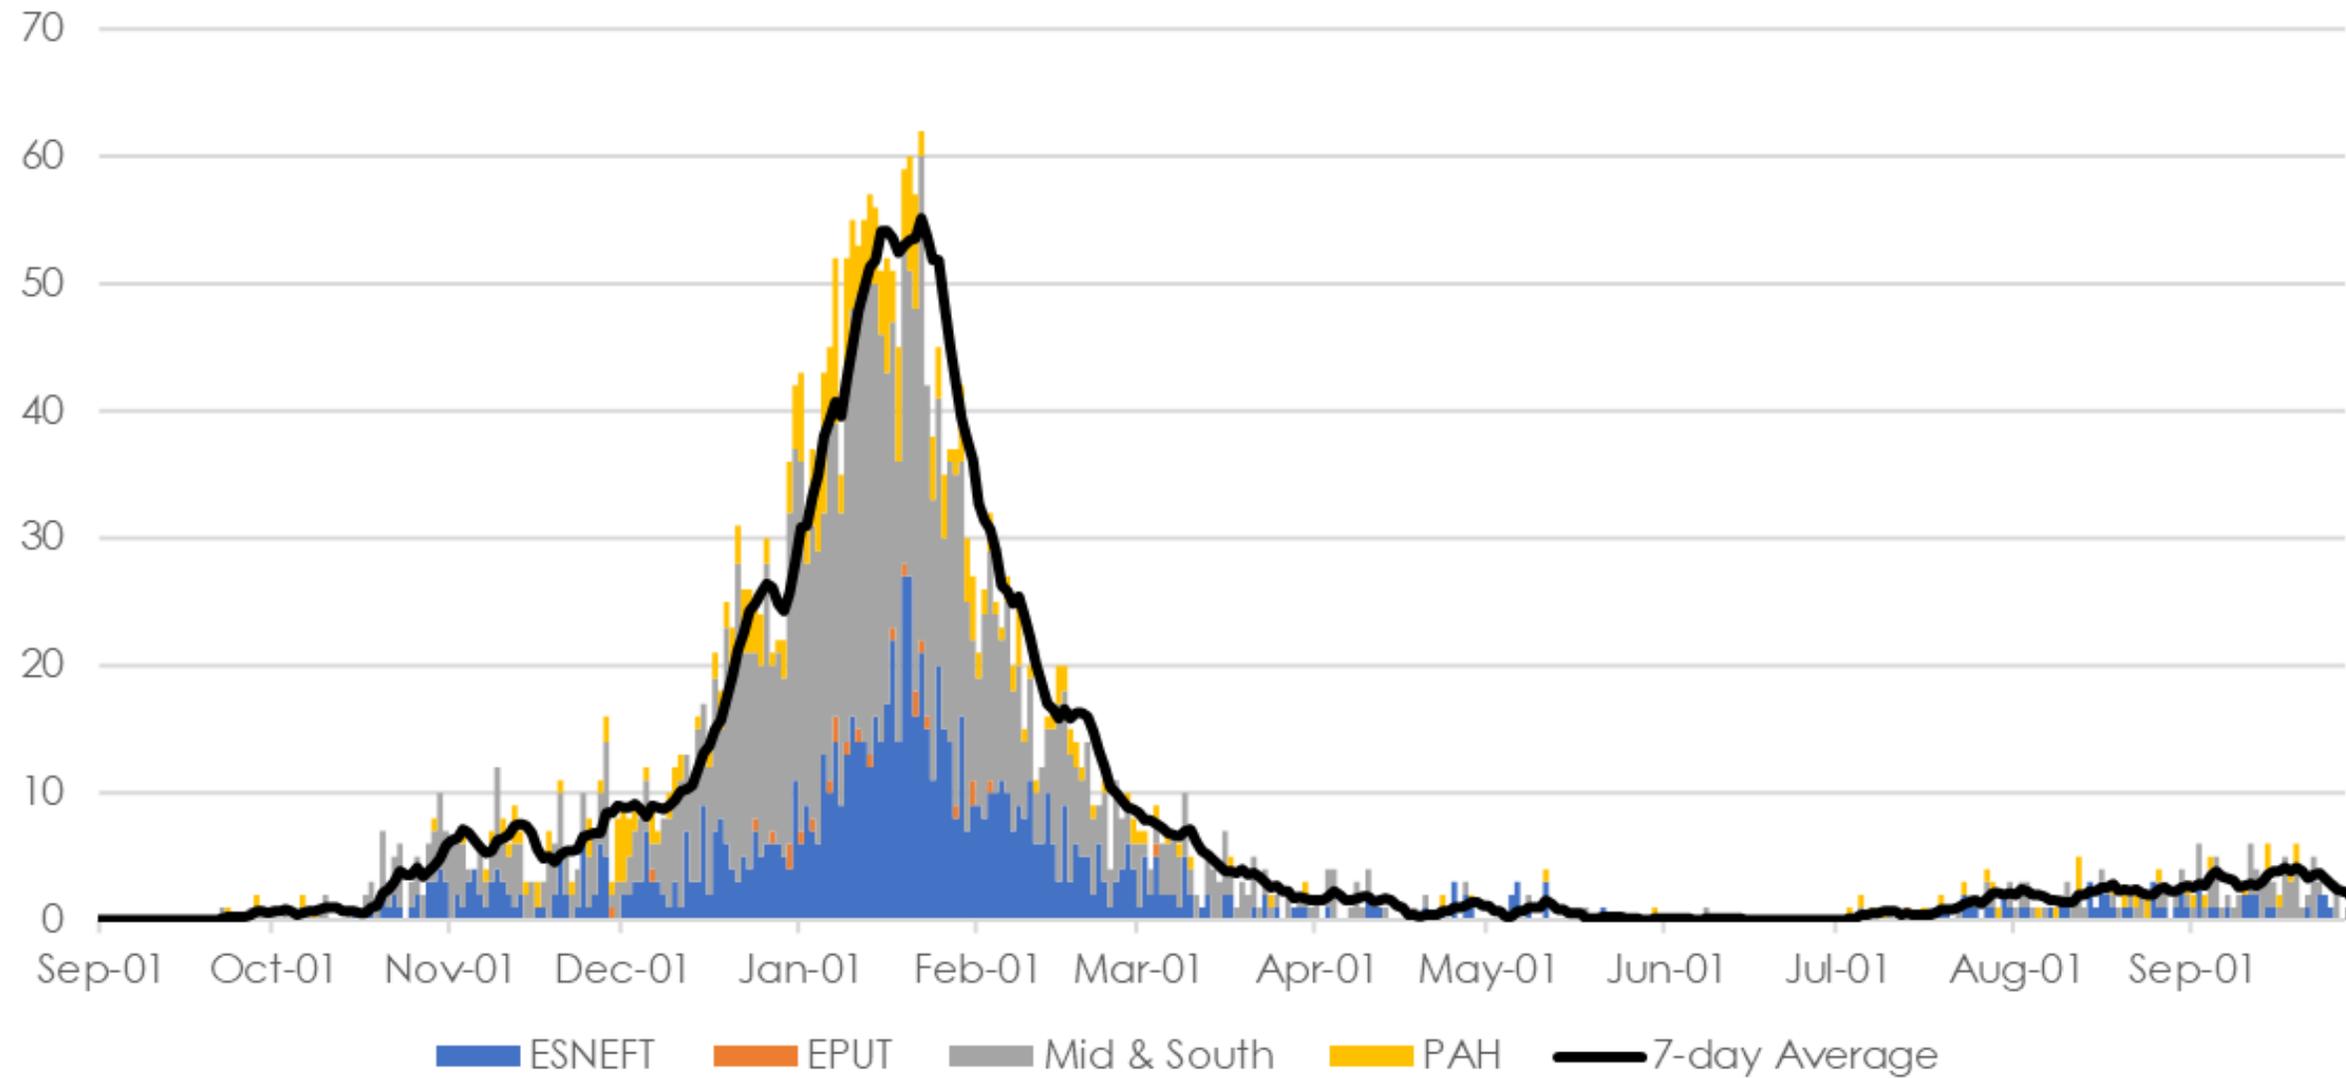

EPUT (7)

Number of confirmed COVID-19 patients occupying beds as of 8am

COVID-19 Hospital Deaths

Key issues

- Overall rates are fairly steady despite schools return, rates are falling slightly in older ages. Rising however in “parents” age group
- School outbreak system nationally not working, local systems are being rolled out. Aim is keep children at school by balance intervention and disease
- Twice weekly tests important as many have no symptoms after vaccine
- Hospital admissions are far lower than in last wave with particular reduction in older people
- It appears around 60% of those admitted are unvaccinated
- Vaccination remains the key effective measure, boosters have started but supply a little bumpy. Challenge giving Pfizer away from equipped sites
- School age vaccination well underway
- Some measures of social distancing remain and may help reduce flu
- Main concern remains emergence vaccine resistant variant
