## Current assessment rationale for grading the priority of recommendations in Internal Audit reports

Risk rating	Assessment rationale
Critical	Critical and urgent in that failure to address the risk could lead to one or more of the following occurring:  Significant financial loss (through fraud, error, poor value for money)  Serious safeguarding breach  Life threatening or multiple serious injuries  Catastrophic loss of service  Failure of major projects  Critical Information loss leading to Information Commissioner's Office (ICO) referral  Reputational damage – Intense political and media scrutiny i.e. front-page headlines, television coverage.  Possible criminal, or high profile, civil action against the Council, Members or officers.  Intervention by external agencies  Remedial action must be taken immediately
Major	Major in that failure to address the issue or progress the work would lead to one or more of the following occurring:  High financial loss (through fraud, error, poor value for money)  Safeguarding breach Serious injuries or stressful experience requiring medical treatment, many work days lost. Significant disruption to service (Key outcomes missed, some services compromised. Management action required to overcome medium term difficulties) Major Information loss leading to internal investigation Reputational damage – Unfavourable external media coverage. Noticeable impact on public opinion. Scrutiny required by external agencies  Remedial action must be taken urgently
Moderate	Moderate in that failure to address the issue or progress the work would lead to one or more of the following occurring:  Medium financial loss (through fraud, error or poor value for money)  Significant short-term disruption of non-core activities  Crutiny required by internal committees.  Injuries or stress level requiring some medical treatment, potentially some work days lost  Reputational damage – Probable limited unfavourable media coverage.  Prompt specific action should be taken
Low	Low in that failure to address the issue or progress the work would lead to one or more of the following occurring:  Low financial loss (through error or poor value for money)  Minor errors in systems/operations or processes requiring action or minor delay without impact on overall service delivery schedule. Handled within normal day to day routines.  Reputational damage – Internal review, unlikely to have a wider impact.  Remedial action is required
Assurance Level	Description
Good	Good assurance – there is a sound system of internal control designed to achieve the objectives of the system/process and manage the risks to achieving those objectives. Recommendations will normally only be of Low risk rating. Any Moderate recommendations would need to mitigated by significant strengths elsewhere.
Adequate/ Satisfactory	Adequate/satisfactory assurance – whilst there is basically a sound system of control, there are some areas of weakness, which may put the system/process objectives at risk. There are Moderate recommendations indicating weaknesses but these do not undermine the system's overall integrity. Any Critical recommendation will prevent this assessment, and any Major recommendations relating to part of the system would need to be mitigated by significant strengths elsewhere.
Limited	Limited assurance – there are significant weaknesses in key areas in the systems of control, which put the system/process objectives at risk. There are Major recommendations or a number of moderate recommendations indicating significant failings. Any Critical recommendations relating to part of the system would need to be mitigated by significant strengths elsewhere.
No	No assurance – internal controls are generally weak leaving the system/process open to significant error or abuse or reputational damage. There are Critical recommendations indicating major failings
