18. Post 16 TransportWe are proposing that from September 2014 we discontinue provision of transport assistance for all but those in the following groups:Low income familiesProvide transport assistance to qualifying low income families only but ask for a 50% contribution towards the full cost of transport on existing public/contract transport routes in the CountyStatemented SEN studentsProvide transport assistance to students has a statement of SEN and is attending the school named within their statements as the nearest appropriate school for their post 16 education - public transport will be promoted for this group and travel referrals will be made for all students with the expectation they will be assessed for suitability for training at the end of the first term of post 16 education. A charge for transport will be made on a sliding scale based on the income of the family at the time of application. Students with SEN who are no longer statemented Provide transport assistance to those students who had a statement of SEN in year 11 who will be attending a school or college to continue their education and require additional support to do so. Support will be provided in the form of a grant which will be on a sliding scale based on income. All applications will be considered on the evidence provided to support the claim at the time of application. Other students Other students will be able to purchase transport from the Local Authority but this will be at full cost recovery and only on existing contract or public transport routes, in place at the time of application, where capacity allowed. This will not include the operation of bespoke transport or individual taxis. Families would be able to take advantage of the bulk purchasing power of the County Council and pay a reduced rate for transport on existing services. Transport arrangements It is proposed that we would only provide transport on existing public or contract services. Families would be expected to facilitate their child's attendance at the nearest existing pick up point for the existing service to their home address, regardless of the distance. Do you agree with this proposal?
