

Table 1 – Summary of HGV movements

Operation	Capacity (tonnes per annum)	Weight per load (tonnes)	Typical Number of Loads per day (based on 275 days)	Typical Number of Movements	Maximum Number of Loads per day (based on 275 days per year)	Maximum Number of Movements
Graded Aggregates Products	200,000	20 - 32	36	72	51	102
Ancillary minerals importation	25,000	20-32	4	8	4	8
RMX (incl. cement and additive delivery)	20,000-30,000m ³ per annum	8.5m ³	16	32	20	40
Restoration material import	350,000	18	76	152	90	180
Total (excl. backhaul and therefore maximum)			132	264	165	330
Backhaul estimate	75,000	20-32	(12)	(24)	(15)	(30)
Total (incl. backhaul)			106	212	150	300

Operation	Capacity (tonnes per annum)	Weight per load (tonnes)	Typical Number of Loads per day (based on 275 days)	Typical Number of Movements	Maximum Number of Loads per day (based on 275 days per year)	Maximum Number of Movements
Graded Aggregates Products	200,000	20 - 32	36	72	51	102
Ancillary minerals importation	25,000	20-32	4	8	4	8
RMX (incl. cement and additive delivery)	20,000-30,000m ³ per annum	8.5m ³	16	32	20	40
Restoration material import (inc 75,000 TPA for recycling)	225,000	18	45	90	60	120
Total (excl. backhaul and therefore maximum)			101	202	135	270
Backhaul estimate	75,000	20-32	(12)	(24)	(15)	(30)
Total (incl. backhaul)			89	178	120	240

Table 2 – Summary of HGV movements post DCO works
