Date: 04 April 2019

Dear Sir / Madam,

PROPOSED TRAFFIC REGULATION ORDER – NO ENTRY & TURN PROHIBITION, A13 LONDON ROAD, HADLEIGH

This is an invitation for you to make comment on a proposal to implement a No entry and a Right Turn Prohibition TRO, as part of a road restructure for the Hadleigh Morrisons on A13 London Road, as shown in the attached plan.

Planning permission has recently been granted by Castle Point Borough Council, to approve works scheduled to make traffic improvements to the existing Morrisons access entrance lane, from A13 London Road, Hadleigh. The existing entrance lane adjacent to A13 London will be reshaped and repositioned, to allow room for a separate exit lane next to this entrance, to be constructed to better accommodate vehicles exiting the Morrisons car park. As A13 London Road is one way, vehicles using this planned Morrisons exit lane must turn left out onto A13 London Road. This will therefore require a prohibition of a right turn order to ensure vehicles do not turn out the wrong way.

The implementation of this new Morrisons exit lane will also be one way, like the entrance lane as they eventually merge when further into the Morrisons car park. It is therefore also necessary to have a No Entry order on this planned exit lane for vehicles coming from A13 London Road, as they must use the correct entrance lane to gain access to Morrisons.

SCHEDULE:

Right Turn Prohibition: From the southbound Morrisons access road exit lane, onto A13 London Road.

No Entry: To the Morrisons access road exit lane, from A13 London Road.

I would therefore be grateful for your comments on the following proposals. Once comments have been received and reviewed the proposals will then be formally advertised enabling all interested parties to comment further.

I enclose a drawing illustrating the proposal for your information and would be pleased to receive your comments in writing or via email within 14 days of the date of this correspondence.

Yours Sincerely,

Rio Lovett | Business Admin Apprentice
